

Security

Servicad Email Manager

Secure, reliable email service can make all the difference when it comes to employee productivity, especially in today's frantic economy. Servicad can help you find an email solution that protects your organization from viruses and spam, like our cloud-based Email Manager.

Version 1.0

November 1st, 2012

SERVICAD EMAIL MANAGER

Servicad Email Manager is a gateway email appliance that checks every email for spam and viruses without requiring new server or desktop software. By preventing harmful, offensive and costly emails from entering your employee's inboxes, you can improve productivity, simplify your email maintenance and reduce costs.

HIGHLIGHTS

MONITOR & DOCUMENT EMAIL USE

Servicad offers email monitoring services, allowing you to track statistics for email traffic, spam, viruses, senders, recipients and more.

AUTOMATE REGULATORY COMPLIANCE

Automatically add signatures and disclaimers to your outbound mail, to ensure that your messages are always effective and compliant.

MULTILAYER FILTERING

Our leading anti-spam technology scans all of your email for viruses and malware in real time. Potentially malicious emails are then tagged, quarantined or deleted. Our filtering system has a high accuracy rate and continuously improves over time, as it identifies email patterns and trusted contacts.

KEY FEATURES

- ✓ Email security and anti-spam protection requires no special hardware or software to install
- ✓ Email spooling for up to 30 days to improve business continuity in the event of a server outage
- ✓ Tools for email policy management, including content filtering for both incoming and outgoing mail
- ✓ Improves mail server and network performance

WHY CHOOSE SERVICADE EMAIL MANAGER

Traditional anti-spam solutions are often expensive to manage, maintain, and upgrade and on-site deployment models introduce additional points of failure and require more on-site labor and expertise. Servicad Email Manager is a cloud email security solution that delivers comprehensive protection from spam, viruses and more, while ensuring email visibility and control for administrators and dynamic, per-user filtering for employees.

HIGHLIGHTS

AFFORDABLE

By preventing spam and other dangerous emails from reaching your employee's inboxes, you can increase productivity and save on costly maintenance.

RELIABLE

Your service is hosted in world-class data centres to eliminate outages and other ongoing management concerns.

SECURE

Our Email Manager leverages the cloud to give you always-on protection. With high accuracy rates and updates applied every 15 minutes, Servicad Email Manager offers the best possible protection against all of the latest threats in the industry.
